Web Developer at Bharath Intern

Developed three websites using HTML, CSS, and JavaScript.

Gained hands-on experience in web development.

Created the following websites:

Portfolio Website: Designed a personal portfolio website to showcase skills and projects.

Temperature Converter: Built a web application for converting temperatures between different units.

Netflix Webpage: Crafted a responsive webpage inspired by the Netflix user interface.

INTERNSHIPS

Oasis Infobyte, 1 Months

Mastered web development with three websites showcasing HTML, CSS, and JavaScript skills. Created a dynamic web-based calculator, an engaging tribute page using HTML, CSS, and JavaScript, and a functional todo web app, highlighting proficiency in building user-centric solutions.

Bharath Intern, 1 Months

Demonstrated substantial hands-on expertise in web development through diverse projects:

Portfolio Website: Crafted a professional showcase of skills and project accomplishments.

Temperature Converter: Developed a web-based application for temperature conversion.

Netflix Webpage: Designed a user interface inspired by the acclaimed Netflix platform.

PROJECTS

Modeling and Predicting of Cyber Hacking Breaches, 2 Months

Major focus of this project is Modeling and predicting of Cyber hacking breaches.

A breach can be an accession of a data provided without any permission from any organization or application.

These kinds of regulations should provided with safe and secured framework.

The data breaches are sensitive, confidential or otherwise protected

data has been accessed in an unauthorized fashion.

Modeling and predicting of cyber hacking breaches project I was used few

Technologies used: Pyhton, Django, HTML, CSS

My Portafolio Website, 1 Weeks

Diligent professional with a robust foundation in Portafolio, showcasing expertise through hands-on experience with technologies such as HTML, CSS, Javascript.

Adept at presenting educational background and skills effectively. Proven ability to leverage to deliver impactful results.

Eager to contribute technical proficiency and passion for innovation in a dynamic work environment.

Convert Temparature from Celsius to Fahrenheit, 4

Days

Developed using HTML, CSS, and JavaScript, this temperature converter allows users to seamlessly convert between Celsius and Fahrenheit.

The user-friendly interface employs HTML for the structure, CSS for styling, and JavaScript for dynamic functionality.

Calculator App, 1 Weeks

Implemented with HTML, CSS, and JavaScript, this calculator app leverages HTML tags to construct the basic structure, including headings, paragraphs, and buttons enclosed within <div> containers.

This project demonstrates the seamless integration of these technologies to create a functional and user-friendly web application.

Basic To do WebApp, 6 Days

Developed with HTML, CSS, and JavaScript, this minimalist To-Do Web App allows users to manage tasks efficiently. JavaScript dynamically handles task addition, deletion, and completion through event listeners, ensuring a responsive and interactive user experience. This project showcases the integration of these technologies to create a straightforward and effective task management tool.
